

HOT SUMMER SUN TRYING ON THE COMPLEXION

How to Protect Your Skin and Bring Roses to Your Cheeks

A Free Ointment Prescription Does Its Work Overnight. You Can Prepare It at Home.

New York—Exposure to sun, dust and wind has a very bad effect upon the skin and complexion. There is a way to overcome this. "It is my own discovery and it takes just one night to get such marvelous results," says Miss Diana Wilder, when her friends ask her about her wonderful complexion and the improved appearance of her hands and arms. "You can do the same thing if you follow my advice," she says. "I feel it my duty to tell every girl and woman what this wonderful prescription did for me."

Just think of it, all this change in a single night. I never tire of telling others just what brought about such remarkable results. Here is the identical prescription that removed every blemish from my face, neck, hands and arms. I tell you try it you can form no idea of the marvelous change it will make in just one application. The prescription, which you can prepare at your own home, is as follows:

Go to any grocery store and get 10 cents worth of ordinary oatmeal, and from any toilet counter a bottle of Derivolt. Follow the directions for using oatmeal as given in every package of Derivolt. If it is more convenient, you can use Derivolt-oatmeal Soap instead of oatmeal.

The first application of Derivolt will astonish you. It makes the skin appear transparent, smooth and velvety, giving any one a youthful appearance.

I especially recommend this method for a dark soiled skin, shiny nose, tan, coarse pores, rough skin, redness, wrinkles and so forth every blemish the face, hands and arms are heir to.

If your neck or chest is discolored from exposure, apply this combination and the objectionable defect will disappear as if by magic. It is absolutely harmless and will not produce or stimulate a growth of hair. No matter how rough and unattractive the hands and arms or what abuses they have had through hard work and exposure to sun and wind, this oatmeal-Derivolt combination will work a wonderful transformation.

Over a million girls and women are now using it in preference to face powder and other beautifiers. This is what two well known actresses say about it:

Dorothy Dalton, the beautiful actress, says: "The first application of this wonderful Derivolt-oatmeal combination will astonish you. It imparts instant beauty to the skin and makes a rose-white complexion every one will talk about. It protects my skin in all kinds of weather. That's why I prefer it to all other preparations and am never without it."

Viola Dana, the well known star, writes: "I am often asked how I keep my complexion so fresh looking. It's a simple process for any one to have a smooth, velvety, rose-white, girlish complexion if she will use Liska cold cream to cleanse the skin and that well known toilet preparation, Derivolt, to beautify it. I recommend these preparations to all my personal friends and to just as enthusiastic over them as I am."

Note: To get the best effect be sure to follow the complete directions contained in every package of Derivolt. Derivolt and Derivolt-oatmeal Soap guarantee that there will be a noticeable improvement after the first application or they will refund the money. It is sold in this city under a money-refund guarantee by department stores and all druggists, including the People's Drug Store.

Pure, Crystal-Clear Cubes of Ice

Another Way Lipman Automatic Refrigeration Guards Your Health

THE cake of ice in your refrigerator—innocent looking, isn't it? But trace it from its source! Dragged across the floor of the ice house, dumped into a truck, exposed to germs and dust from the street—no wonder as it melts away into nothing it leaves a messy, murky deposit in the drain pipe. No wonder it menaces your health when used in drinking water.

LIPMAN automatic refrigeration banishes this common cause of disease. In addition to supplying continuous, germ-ice cold, it keeps on hand a quantity of dainty little cubes of ice—crystal clear because frozen from the same water you use for drinking. Also freezes ices, chills custards and salads and holds ice cream solid until ready for serving.

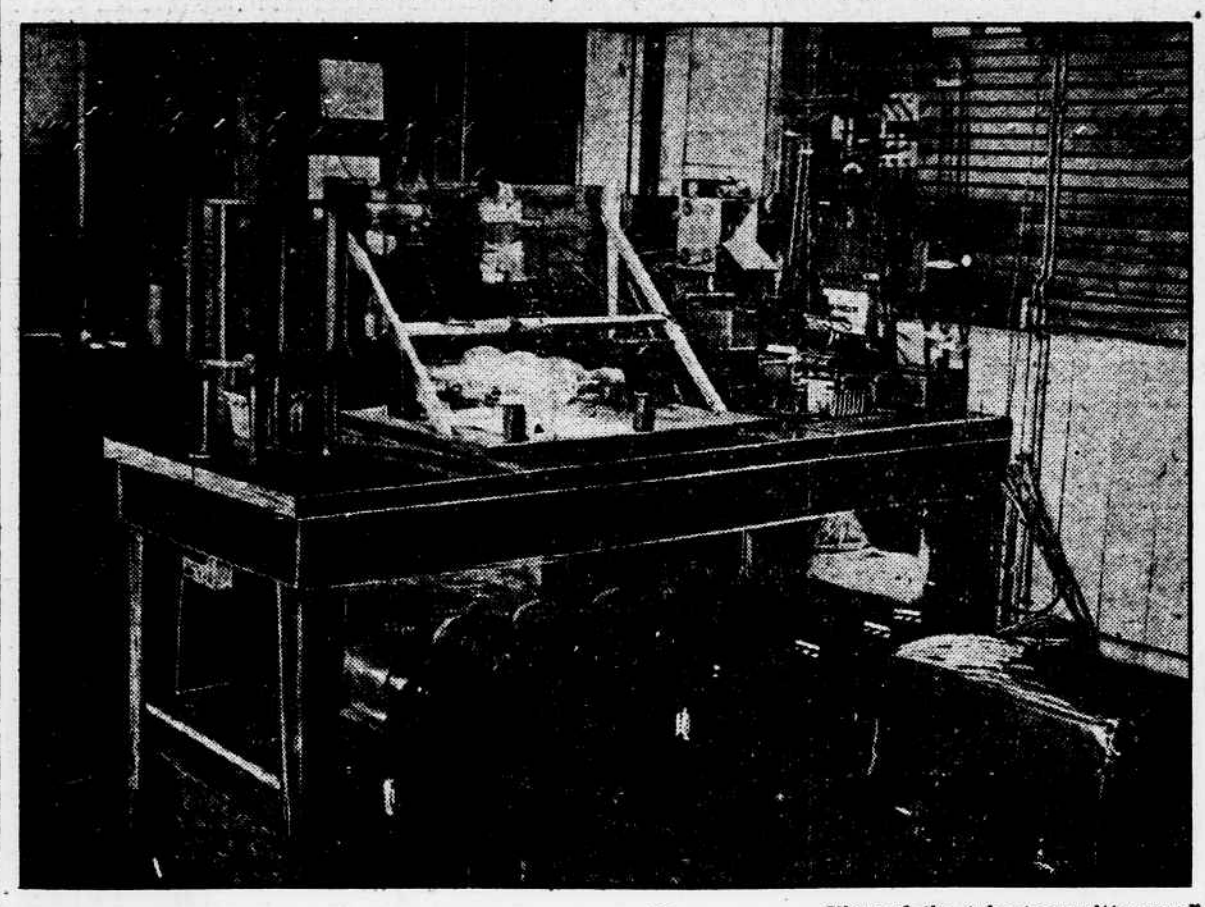

LIPMAN Automatic Refrigeration costs less than ice. Phone us today and ask to see a demonstration. No obligation.

AUTOMATIC REFRIGERATION
Experienced Advertisers Prefer The Star

APPARATUS OF LOCAL RADIO STATION WHICH IS ASSISTING IN ENTERTAINING THOUSANDS OF FANS.

View of the tube transmitter used at Anacostia for broadcasting the experimental concerts. The apparatus is so arranged that modifications can easily be made.

clusion of your program, the strains of "The Star Spangled Banner" caused the director to rise to his feet. Thanks again for your entertainment, and may we soon hear from you again.

The fact that this gentleman, who is the head of a presumably prosperous manufacturing concern, was enjoying the privacy of his own home did not deter him from standing while the national anthem came in.

A representative of a talking machine company in Atlanta, Ga., writes: "I am a subscriber to the program of your program of last evening sent out by radio. This is the first time I have had the pleasure of listening in on any of your programs. Your modulation is particularly good, and although the static was fierce, every word was clearly heard. I am very much interested in your program. Let the good work continue."

There can be no more convincing evidence of the effectiveness of a radio station than the report of perfect reception of speech through heavy static conditions.

A gentleman writes the following from Chesley, Ont., Canada: "Just a note to let you know that I heard your concert last night. It came in very well, and as I am about 500 miles away, I think this is a pretty good record."

A very good record for this gentleman's receiver, which he describes, as well as a tribute to NOF.

The owner of a country estate near Middleburg, Va., writes: "Following your suggestion, I take your great pleasure in thanking you for the entertainment by the Marine Band. We have a loud speaking horn, which we took to the telephone, and our local central called all our friends at the neighboring houses and let them share in the good time."

Thoughtfulness for the pleasure of others shows here, as well as the adaptation of wireless to wires.

Surpassed by None.

A member of the Tigers Club, Canton, Ohio, writes: "Heard your most delightful radio concert Wednesday evening by the various members of the United States Marine Band. Every number was heard, including 'The Star Spangled Banner' was mighty fine. We hear most of them, and none have surpassed NOF-United States Marine Band."

"It is likely that such members of this club who can possibly arrange it will be on hand on succeeding Wednesday evenings."

A lady who gives her post office address as 1212 14th St. N.W., writes as follows: "The concert last night by the United States Marine Band, broadcast from Anacostia, was perfectly lovely, clear and distinct. Could be heard all over our district. It was enjoyed more than any concert we have listened to since installing our instrument. Are we to hear the United States Marine Band again?"

Farm Less Lonely.

Obviously the long nights on the farms throughout the country, especially in winter, will be less lonely in the future than they have been in the past. In answer to this inquiry it can be stated that these concerts will be held more often than we can possibly arrange to keep them going.

An enthusiast writes from Cambridge Springs, Pa.: "This is to inform you and your men of the Marine Band that I received your concert last night. It was very good, clear and loud. We could hear it all over the house with only one head set, and it was very good. I am very glad to hear that you are as busy with musical instruments as they are with Springfield. Please send me your program. I want to thank each one of the men that plays in the Marine Band for their concert."

In view of the numerous requests received asking for information concerning the Anacostia station, and as it is impossible to answer these individually, a description of NOF will be given in a succeeding article.

ANACOSTIA RADIO STATION SHOWING TWO MASTS 100 FEET HIGH WHICH SUPPORT THE TRANSMITTING ANTENNA.

RADIO FANS IN 16 STATES HEAR MARINE BAND PLAY

Experimental Concerts Have Advancement Of Art as Aim—Criticism by Public to Aid.

BY COMMANDER STANFORD C. HOOPER, UNITED STATES NAVY,
Head of the Radio Division of the Navy Department.

(Copyright, 1922, by Stanford C. Hooper. All rights reserved.)

Today the famous United States Marine Band, performing in the capital of the nation, concludes a certain weekly program with the usual rendition of "The Star Spangled Banner," and thousands of our people in their homes in distant cities, towns and villages; in stately country mansions and modest farm houses, and even on the decks of our ships at sea, pay reverent respect to the melodious strains of this noble anthem which travel to them on the wings of the mysterious unseen ether waves.

These experimental concerts pure and simple, and inaugurated by the Navy radio service in its efforts to further advance the reliability and effectiveness of the radiophone.

These experimental concerts are unique in that their principal objective is the advancement of the radio art on the part of the Naval radio experts, assisted by constructive criticisms from the general public.

Pure Waves Object.

There is never any question as to the excellence of the music produced by the Marine Band. The objective of the radio experts is to improve the equivalent of these melodies on ether waves so effectively that they may be reproduced in all their purity at any point within the receiving range of the radiophone. The assistance which we earnestly request the general public to give us in connection with these experimental concerts is to criticize the service which we render them. Being human, we are, of course, susceptible to praise, but we must not lose sight of the fact that our mission is the further development of the radio art for the service of our country.

We would be especially gratified if all observers would state briefly the type of aerial used, whether an indoor loop or an outdoor antenna, whether crystal or tube detector, and if amplification is used, the number of stages, the audibility of the signals, whether weak, fairly loud or very loud, the quality of the signals for music and speech, the relative intensity of static, as compared to air wave, whether or not the signals have a tendency to fade, and whether the wave can readily be tuned in without interference from other stations.

Any radio fan, whether he be a bank president or schoolboy, who forwards us information in connection with these experimental concerts, may be assured that not only is he taking an important part in these experiments, but is rendering valuable service to his country.

Public Asked to Help.

Realizing the difficulties of relying on laboratory observations to judge the results of modifications in apparatus and operating methods, we secured the services of the Marine Band to play in the naval radio laboratory at Anacostia, D. C. (NOF) on Wednesdays of each week from 8:30 to 9:10 p.m., twenty-five minutes standard time, without involving any expenditures for music or radio service.

The first Marine Band concert was given on May 31, and in announcing this concert from NOF, the public was requested to submit the results obtained, particularly at points distant from Washington.

It was not expected that a great many letters would be received until perhaps two or three concerts had been given, and the radio fans had become aware of these experimental concerts, because the Anacostia station, although the pioneer in the inauguration of regular broadcasting programs, is restricted, to a certain extent, by governmental regulations in the variety of its programs, and it was assumed that most radio fans would be tuned to receive the programs of privately operated stations, which are not so restricted.

Moreover NOF broadcasts on a wave length of 412 meters, whereas the other stations operate on wave lengths around 360 meters.

This assumption was found to be correct because a majority of the letters received reported tuning in on NOF or only the last part of the program, but every letter received indicated that NOF would always be tuned in for succeeding concerts.

Letters From Sixteen States.

Letters were received from sixteen states on the Atlantic seaboard, from Maine to Florida, and inland as far as the middle west. Also from two Canadian provinces, Ontario and Quebec.

Hitherto the Navy radio has always been an army or radio amateur station, and as such has been a very popular radio station for the Navy in time of need. Judging by the letters received, this condition has changed, because it is evident that even bank presidents and the housewife on the farm are now well versed in radio.

Desire to quote from a few of the letters received as a tribute to the quality of the service and the area over which it was made effective during the first concert. It is regretted that available space will permit of only a very few quotations from the many letters received: "The president of a large printing establishment in Ottawa, Canada, writes: 'This is to advise you that I received your broadcast concert last night very distinctly. I use a magnavox, and a number of items of your program could be heard two blocks from my home. Ottawa is about 800 miles north of your station.'"

Results Are Remarkable.

Obviously, such results are remarkable when it is considered that we are now in the heavy static season and the radiophone is still in its very infancy. Infants may be enjoyed by our people all over the United States and even by the people of Canada.

The president of a dental and medical prescriptions manufacturing concern of Allentown, Pa., writes: "I wish to thank you for the very pleasant concert received on my home-made set of one detector tube and permit of only a very few quotations from the many letters received: 'The president of a large printing establishment in Ottawa, Canada, writes: 'This is to advise you that I received your broadcast concert last night very distinctly. I use a magnavox, and a number of items of your program could be heard two blocks from my home. Ottawa is about 800 miles north of your station.'"

WEATHER PREDICTIONS TO BE GIVEN BY RADIO

Broadcasting of Reports East of Mississippi River Will Begin Tomorrow.

Beginning tomorrow, the forecasts issued by the weather bureau at New England, New York, Pennsylvania, New Jersey, Maryland, the District of Columbia, North and South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, West Virginia and Ohio will be broadcast each morning and night at 10 o'clock from the naval radio station at Anacostia, D. C.

These forecasts are those issued regularly twice daily for the individual states as named and will include a general forecast for the sections of the country east of the Mississippi river, with the exception of Illinois, Indiana and Wisconsin. On Wednesday mornings a summary of the weather of the preceding week as it affected crops will also be included. The broadcasts will be by telegraph code, using 2,550 wave length in the morning and 2,850 wave length at night.

A similar program has been put into operation at the naval radio station at Great Lakes, Ill., for broadcasting the state forecasts for thirteen of the western states and for the upper and lower lakes, which are issued from the weather bureau district forecast center at Chicago.

RECOVERS FROM ILLNESS.

Chaplain Henry J. Geiger has been relieved from further treatment at Walter Reed General Hospital, this city, and ordered to Chamato Field, Ill., for duty.

BY RADIO TODAY

Complete Programs of Radio Broadcasting Stations.

WAA—Naval Radio Station, Radio, Va.
10:30 a.m.—Meteorological report on 5,550 meters of arc transmitter.
11:00 a.m.—"Time signal," followed by weather report and ship orders.
1:30 p.m.—Naval press news; wave length, 2,650 meters.

WDM—Church of the Covenant (360 Meters).

3:30 p.m.—Radio chapel, Quaker services, conducted by Rev. Albert Russell of Swarthmore, Pa.
4 p.m.—"Important Books of the Year," by John Farrar, editor of the Bookman.
6:30 p.m.—Readings and records from "The Bible Books That Sing," by Wesley A. O'Leary.
8 p.m.—Sermon by Rev. Mebane Ramsey, pastor of the Calvary Presbyterian Church of Staten Island.
9:30 p.m.—Recital by Salvatore Cloff, violinist, accompanied by Edward H. Mignani.
9:45 p.m.—Concert by the Carlow Male Quartet.

CHASE ENDS IN CAPTURE.

Suspected Violator of Dry Law Pursued While Bullets Fly.

A seven-mile chase at the speed of more than sixty miles an hour, with bullets flying, resulted in the capture by prohibition agents, near Anacostia, Md., Friday night of George Dodson, a touring car and 105 gallons of corn liquor.

Revenue agents suspected the car when they saw it near Hyattsville, and took up the chase. Good marksmanship of one of the agents shot a tire from the car, and finally punctured the gasoline tank. With that the two negroes in the car made a flying leap and escaped. Dodson attempted escape, but came up against the fence in a daze.

He was lodged in the Hyattsville jail Friday night and taken to Baltimore yesterday for arraignment before United States Commissioner Sullivan.

MANY LOCAL ARTISTS TO GIVE RADIO CONCERT

WJH Station to Assemble Many for Program Tuesday Evening.

An array of local artists such as is seldom assembled together for a concert will render an all-Washington program by radio at the broadcasting studio known as WJH—White & Boyer Company—Tuesday night at 7:45 o'clock. Durward Bowersox, local boy violinist, will play selections, with Miss Marie Belt accompanying. Miss Gladys Price, Washington's own prima donna, who has appeared in all the principal amateur offerings here, will sing some favorite numbers in her repertoire. Miss Emma Price, another feature of this all-star program will be James K. Young, the National Capital's favorite tenor, who has led the St. Patrick Players to a triumph for the past two seasons. Earl Carbaugh, popular baritone, will sing, among his other choice numbers, "My Curly-headed Baby" (Clusman). The two last named artists will be accompanied by their wives.

J. E. S. Kinella, who will be remembered as the bass of the old Imperial Quartet, which was famous during the world war, is among the stars. It is coincidence that in arranging this concert

HAIG TO MAKE LIQUOR.

Field Marshal Will Join Distillers' Board.

LONDON, June 24.—Field Marshal Haig is soon to enter the liquor trade. He will join the distillers' board, which is a director of the firm of John Haig & Co., Ltd., the distilling interest in the company was acquired in 1919 by the distillers' company limited of Edinburgh, holding corporation for one of the largest groups of whisky interests in the world. The field marshal will join the distillers' board in July. His family has been connected with the Haig company since 1877, his father having been one of the founders.

The Four-Passenger Victoria

Whatever adds to satisfaction in motoring is incorporated in Cadillac regardless of cost. Cadillac would never gold plate the wheels, but Cadillac would spend the price of gold plate if it were possible to make the wheels more substantial or more satisfactory.

Cadillac experimental engineers have no knowledge of manufacturing cost. Their instructions are to develop the best without keeping any cost figures.
